

Autobest Fuel Pumps and Module Assemblies

Only top grade components make up each Autobest fuel pump, fuel pump module and strainer

Autobest has been in the United States since 2007, but the experience in the manufacturing of top quality fuel system products goes back to 1994 in China. State-of-the-Art technology along with some of the world's top minds has earned us an ISO/TS 16949: 2009 Certification.

- Autobest provides the highest quality product available for the price conscious customer in mind
- Confidence comes with the installation of an Autobest product
- All products are vigorously tested at all intervals of the manufacturing process
- When you choose Autobest, you are assured that the quality is built in!

Original Equipment Supplier

Because of the quality and durability, you can find Autobest fuel system components:

- Delivered with vehicles right from the factory
- In the aftermarket through the private label program under various well-known brand names

What to Expect with your Autobest Fuel Pump

- Autobest uses only top quality materials to ensure product quality
- Tested at many points throughout the manufacturing process to ensure durability and reliability
- Superior ethanol tolerance for today's fuel systems
- Supplied with a 12 Month Unlimited Mileage Warranty

OEM Quality - The Right Choice!

The Electric Fuel Pump

Fuel delivery systems have one common element that is at the center of every type of module assembly or in the tank hanger and that is the electric fuel pump. All electric fuel pumps operate on current from the vehicles battery or charging system to move fuel, under specific pressure to the carburetor or fuel injectors.

OEM Quality Fuel Pumps and Module Assemblies

Most vehicle manufacturers use in-the-tank module assemblies, which are made of fuel-resistant plastic. Autobest fuel pumps and module assemblies are built under strict guidelines to meet or exceed manufacturers' requirements. Because Autobest is an OEM supplier, extra attention to the quality in raw materials and design results in higher performance and durability.

Manufacturing Process

Autobest is a vertically aligned company which means that all manufacturing aspects of the factory come under the same stringent requirements; from obtaining raw materials to final testing. Autobest engineers have spent hours and hours on each component design to ensure the end product is made with the complete satisfaction of the consumer in mind.

Value Built-In

Autobest never uses sub-par materials to cut the manufacturing expense; instead, Autobest uses quality to build value right in to every item they make.

Focused on Quality

As an ISO/TS 16949: 2009 Certified Company, Autobest's reputation has always been focused on quality. Only the finest quality metals, plastics and wiring are used in the manufacture of all Autobest's products. Because Autobest manufactures and assembles everything they sell, they have complete control over quality and consistency in products.

The Autobest Fuel Pump Line

High Performance Direct Fit Fuel Pumps

A direct fit High Performance fuel pump!

High Performance Universal Fuel Pumps

Universal High Performance fuel pumps for your custom application.

Universal Fuel Pumps

For many applications, with varying PSI and GPH ratings.

Transfer Fuel Pumps

Gasoline and diesel universal transfer fuel pumps.
